2021 IDD SYSTEM CAPACITY REPORT

Survey is sent to the providers to fill out. It asks about what areas they are having trouble with in regards to capacity, workforce, and general overall health of our system.

Sedgwick County is growing – increased 49 individuals approved for services. As of the end of 2021, Sedgwick County has 958 individuals on the HCBS waiver waiting list

Looking to gather data on out of county transfers in to Sedgwick County due to lack of available services in their county.

The number of people served is growing, but our provider network is not.

Reimbursement rates especially for case management was one of the biggest concerns for provider.
