Mr. Kretchmar was present to speak on the Public Agenda. Mr. Kretchmar is questioning why does garages on apartment complexes have to be wired in a raceway type wiring method? We are allowing up to three story buildings with dwellings to be wired in NM-B. Mr. Kretchmar stated that his opinion is it is not a safety factor because the occupancy load is not that many. He stated that he understands the need to keep the wiring in the clubhouse as commercial because of the occupancy load.

New Business

Mr. Kerschen handed to the Board Members a packet that contained all the changes from the currently adopted ASME A17.1 Safety Code for Elevators and Escalators up to the 2013 version. Mr. Kerschen explained that even though it appears to be a lot of changes, most are very minor just clarifying a section or relocating a section to another part of the code where it will make it more convenient to locate. He said he would have the major changes identified by the April meeting.

With no other business to conduct, Board Member Kilian made a motion to adjourn. Board Member Naylor seconded the motion. The motion was approved.

The meeting adjourned at 4:14 p.m.
